FINISHES

REDESIGNED FROM THE GROUND UP:

This redesigned unit features a 2 stage design: the head unit and the stem. The head simply screws onto the top of the stem for easy installation and cuts down on maintenance time when it's time to change bulbs. Also, since the stem is compatible with all the mini PASH style landscape lights, if you decide to change styles, you don't have to install a brand new fixture; simply change the head of the landscape light and you can achieve a brand new look.
