

Ultra bright

Die-cast aluminum

Easy installation

Unique shape

Epoxy powder paint

All aluminum housing and epoxy coating

All die-cast aluminum housing is durable, fast heat dissipation, harsh environments can keep working well. Brown epoxy resin powder coating, frosted texture will not reflect light to cause dazzling.

Integrated chip and unique umbrella cap

Integrated fluorescent chip, 5W low power, 400 lumens of high brightness, long life, high temperature resistant frosted pc lens, bring you a comfortable sense of light.

Aluminum stake and cable & connectors

Unlike plastic, aluminum ground stakes provide greater support, and the thin arrows are easily inserted into the ground. 39" copper wire is UL listed, and each fixture comes with two connectors to keep your family safe at all times.

Path lights for sidewalks

Nocturnal activities become abundant, this landscape lighting fixture is suitable for most path scenarios, such as, sidewalk, roadway, backyard, hotel and plaza, with unique lighting effects and beautiful shapes.

Indicators in the driveway

Always guard you and family safely home, less lights can provide higher brightness, 2700K warm white light to provide a warm atmosphere, whether it is a public road or a private yard road, it is the ideal choice.

Garden or courtyard area accent lighting

Avoid dazzling, not like uplighting, this downlighting will protect the eyes well, with a 360° full irradiation range, with a wide range of applications in flower beds and patio accent area lighting.

GARDENCOIN - YOUR LIGHT MAGIC

As the star product of Gradencoin, the outdoor die-cast aluminum landscape lighting series has super high cost performance and brings great value to your outdoor life.
