

Die-cast aluminum

Easy installation

Unique shape

3-in-1 color

Epoxy powder paint

All aluminum housing and epoxy coating

All die-cast aluminum housing is durable, fast heat dissipation, harsh environments can keep working well. Brown epoxy resin powder coating, frosted texture will not reflect light to cause dazzling.

Integrated chip and 3-in-1 CCT

This embedded chip has a longer service life, saving energy while ensuring sufficient brightness. Manual 3-in-1 color temperature change, you can choose and light color according to different seasons.

Aluminum stake and cable & connectors

Unlike plastic, aluminum ground stakes provide greater support, and the thin arrows are easily inserted into the ground. 39" copper wire is UL listed, and each fixture comes with two connectors to keep your family safe at all times.

Path lights for sidewalks

Nocturnal activities become abundant, this landscape lighting fixture is suitable for most path scenarios, such as, sidewalk, roadway, backyard, hotel and plaza, with unique lighting effects and beautiful shapes.

Indicators in the driveway

Always guard you and your family home safely, suitable for park and private yard road, 4.9 feet installation distance, 4 feet visible irradiation range, of course you can also adjust the spacing according to the actual situation properly.

Garden or courtyard area accent lighting

This light is uniquely shaped just like 7, showing the owner's personality, widely used in garden and backyard, use your design talent and install it in the area you think is appropriate.
